

## CASE STUDY – DIRECTIONAL DRILLING

# GREEN DRAGON GAS

### Client

Green Dragon Gas

### Service

Directional Drilling

### Location

Gaunxi, China

### Project Challenges:

- First ever surface to inseam intersecting wells drilled in China
- Extremely challenging ground conditions with soft and friable coal

### Equipment Used:

- Schramm T685 and full suite of directional drilling tools

### Client Outcomes:

- Exceptional performance on site with first ever surface to inseam intersecting well completed in China

- Green Dragon demobilised Mitchell after many years to use their own crews and the graph below demonstrates the outcomes
